

OZONE DEPLETING SUBSTANCES

The most common Class I ozone depleting substances are:

Type	ODS
Refrigerants: Chlorofluorohydrocarbons (CFCs) Hydrochlorofluorocarbons (HCFCs)	CFCs (R-11 or CFC-11) Mixture of CFCs and HCFCs - R-500 (R-12 and HCFC 152a) - R-502 (CFC-115 and HCFC-22)
Fire Extinguishing Systems	Halon 1211 and 1301
Solvents	Carbon Tetrachloride
Fumigants	Methyl Bromide

Class II substances include HCFC-21 and HCFC-22.
